

**SCIENCE  
BADGE**

**SCIENCE  
AWARD TRUST**

## MAY 2020 NEWS

We have all had to cope with massive changes due to Covid-19, including the education sector. We have been managing to supply resources to some schools and a number of home schoolers during “lock-down”. Our planned writing day had to be done by emails, but we have still managed to keep up with our programme of updating the activity cards.

The most recent updates are to the Science Badge activity cards for:

- » Energy,
- » Geology,
- » Home Chemistry,
- » Ornithology,
- » Psychology
- » Technology

The updated cards are also printed in a new format. The sample activities on the web site have also been adjusted to reflect the updated cards.

Remember we have introduced Star Badges as a reward for those students who complete a number of Science Badges. Some of you may have already seen them. When a student completes the required number of badges: Bronze (5), Silver (10) and Gold (15), the teacher sends the evidence of the completion to

**Nick Atkins** who will supply the appropriate star badge. This is free for the school and student.

Sue Jarvis, on behalf of the Science Award Trust
